Community resources

The Community resources are created by teachers using the *Suburani* course. Files may display differently in Google, but should be fine when downloaded.

If you would like to share any resources that you have created, please send them to contact@hands-up-education.org. Please specify if you would like your name to appear in the description or would prefer to remain anonymous.

Please only use images where you have the right to do so. You are free to use drawn illustrations from *Suburani* in your resources, but do not reproduce the photographs, as they are only licensed for use within the print and digital editions.
